

Construction Sign

We use Japanese production methods with high quality printing ink. 16 production steps are taken to ensure a high quality printing results. We ensure that the prints will not fade, will not tear, will not come off, acid resistant dust resistant and always remain looking like new. (the only construction signs asked for by the Hsinchu Science Park, Taichung Science Park and Kaoshiung Science Parks.

Note : Normal stickers (such as children's stickers, stationery stickers, color prints, ink prints) or other anti-pirating construction grade stickers will fade, agand fall off. To guarantee that you have the best, please use JohnPoint construction signs.
